UID EX 9

AIM:

The aim is to design a modern contact input form that validates user data such as email and phone number and displays real-time validation feedback using HTML, CSS, and JavaScript with Validator.js.

PROCEDURE:

Step 1:

Setting Up the HTML Form

Start by creating an HTML form with input fields for email and phone number along with error message containers.

```
<!DOCTYPE html>

<html lang="en">

<head>

   <meta charset="UTF-8">

   <meta name="viewport" content="width=device-width, initial-scale=1.0">

   <title>Modern Form Validation</title>

   <link rel="stylesheet" href="style.css">

   <link
href="https://fonts.googleapis.com/css2?family=Poppins:wght@300;400;500;600;700&displa
y=swap" rel="stylesheet">

   <link rel="stylesheet"
href="https://cdnjs.cloudflare.com/ajax/libs/font-awesome/6.4.0/css/all.min.css">

</head>

<body>
```

```html
<div class="container">

    <div class="form-card">

        <div class="form-header">

            <h1><i class="fas fa-envelope"></i> Contact Information</h1>

            <p>Fill in your details accurately</p>

        </div>

        <form id="myForm" novalidate>

            <div class="input-group">

                <label for="email">

                    <i class="fas fa-envelope input-icon"></i>

                    Email Address

                </label>

                <input type="email" id="email" name="email" required>

                <span class="error-message" id="emailError">

                    <i class="fas fa-exclamation-circle"></i>

                    Please enter a valid email address

                </span>

                <span class="success-message" id="emailSuccess">

                    <i class="fas fa-check-circle"></i>

                </span>

            </div>

            <div class="input-group">
```

```
                <label for="phone">
                    <i class="fas fa-phone input-icon"></i>
                    Phone Number
                </label>
                <input type="tel" id="phone" name="phone" required>
                <span class="error-message" id="phoneError">
                    <i class="fas fa-exclamation-circle"></i>
                    Please enter a valid 10-digit phone number
                </span>
                <span class="success-message" id="phoneSuccess">
                    <i class="fas fa-check-circle"></i>
                </span>
            </div>

            <button type="submit" id="submitBtn">
                <span class="btn-text">Submit Form</span>
                <i class="fas fa-paper-plane btn-icon"></i>
            </button>
        </form>

        <div id="successMessage" class="success-alert" style="display: none;">
            <i class="fas fa-check-circle"></i>
            Form submitted successfully!
        </div>
```

```
        </div>

    </div>

    <script
src="https://cdnjs.cloudflare.com/ajax/libs/validator/13.6.0/validator.min.js"></scrip
t>

    <script src="script.js"></script>

</body>

</html>
```

Step 2:

Styling the Form with CSS

Add modern UI styling similar to your project (gradient background, rounded inputs, validation colors).

```
* {

    margin: 0;

    padding: 0;

    box-sizing: border-box;

}

body {

    font-family: 'Poppins', sans-serif;

    min-height: 100vh;
```

```
  background: linear-gradient(135deg, #667eea 0%, #764ba2 100%);
  display: flex;
  align-items: center;
  justify-content: center;
  padding: 20px;
  overflow-x: hidden;
}

.container {
  width: 100%;
  max-width: 500px;
}

.form-card {
  background: rgba(255, 255, 255, 0.1);
  backdrop-filter: blur(20px);
  border-radius: 24px;
  padding: 40px;
  box-shadow: 0 25px 45px rgba(0, 0, 0, 0.1);
  border: 1px solid rgba(255, 255, 255, 0.2);
  animation: slideUp 0.8s ease-out;
}

@keyframes slideUp {
```

```
    from {
        opacity: 0;
        transform: translateY(30px);
    }
    to {
        opacity: 1;
        transform: translateY(0);
    }
}

.form-header {
    text-align: center;
    margin-bottom: 40px;
    color: white;
}

.form-header h1 {
    font-size: 2.2rem;
    font-weight: 700;
    margin-bottom: 10px;
    display: flex;
    align-items: center;
    justify-content: center;
    gap: 12px;
```

```
}

.form-header h1 i {
   font-size: 2.5rem;
   background: linear-gradient(45deg, #ff6b6b, #feca57);
   -webkit-background-clip: text;
   -webkit-text-fill-color: transparent;
   background-clip: text;
}

.form-header p {
   font-size: 1.1rem;
   opacity: 0.9;
   font-weight: 300;
}

.input-group {
   position: relative;
   margin-bottom: 28px;
}

.input-group label {
   display: flex;
   align-items: center;
```

```
   gap: 8px;
   color: white;
   font-weight: 500;
   margin-bottom: 8px;
   font-size: 1rem;
}

.input-icon {
   color: #f0f0f0;
   font-size: 1.1rem;
}

input {
   width: 100%;
   padding: 16px 20px 16px 50px;
   border: 2px solid rgba(255, 255, 255, 0.2);
   border-radius: 16px;
   background: rgba(255, 255, 255, 0.1);
   color: white;
   font-size: 1rem;
   font-family: inherit;
   backdrop-filter: blur(10px);
   transition: all 0.3s ease;
}
```

```
input::placeholder {
   color: rgba(255, 255, 255, 0.6);
}

input:focus {
   outline: none;
   border-color: #4ecdc4;
   box-shadow: 0 0 0 4px rgba(78, 205, 196, 0.2);
   background: rgba(255, 255, 255, 0.15);
   transform: translateY(-2px);
}

.error-message,
.success-message {
   position: absolute;
   right: 12px;
   top: 50%;
   transform: translateY(-50%);
   font-size: 1.2rem;
   opacity: 0;
   transition: all 0.3s ease;
}
```

```
.error-message {
   color: #ff6b6b;
}

.success-message {
   color: #51cf66;
}

.input-group.error input {
   border-color: #ff6b6b;
   box-shadow: 0 0 0 4px rgba(255, 107, 107, 0.2);
   animation: shake 0.5s ease-in-out;
}

.input-group.success input {
   border-color: #51cf66;
   box-shadow: 0 0 0 4px rgba(81, 207, 102, 0.2);
}

.input-group.error .error-message {
   opacity: 1;
}

.input-group.success .success-message {
```

```
    opacity: 1;
}

@keyframes shake {
    0%, 100% { transform: translateX(0); }
    25% { transform: translateX(-5px); }
    75% { transform: translateX(5px); }
}

button {
    width: 100%;
    padding: 18px;
    background: linear-gradient(45deg, #4ecdc4, #44a08d);
    color: white;
    border: none;
    border-radius: 16px;
    font-size: 1.1rem;
    font-weight: 600;
    cursor: pointer;
    display: flex;
    align-items: center;
    justify-content: center;
    gap: 10px;
    transition: all 0.3s ease;
```

```
   margin-top: 10px;
   position: relative;
   overflow: hidden;
}

button:hover {
   transform: translateY(-3px);
   box-shadow: 0 15px 35px rgba(78, 205, 196, 0.4);
}

button:active {
   transform: translateY(-1px);
}

.btn-icon {
   transition: transform 0.3s ease;
}

button:hover .btn-icon {
   transform: translateX(5px);
}

.success-alert {
   background: linear-gradient(45deg, #51cf66, #40c057);
```

```
    color: white;

    padding: 20px;

    border-radius: 16px;

    text-align: center;

    font-weight: 500;

    margin-top: 20px;

    display: flex;

    align-items: center;

    justify-content: center;

    gap: 10px;

    animation: slideUp 0.6s ease-out;

}

@media (max-width: 480px) {

    .form-card {

        padding: 30px 24px;

        margin: 10px;

    }

    .form-header h1 {

        font-size: 1.8rem;

    }

    input {
```

```
        padding: 14px 16px 14px 45px;

    }

}
```

Step 3:

Adding JavaScript for Validation

Use Validator.js to validate inputs and show real-time feedback (green for valid, red for invalid).

```
document.addEventListener('DOMContentLoaded', function() {

    const form = document.getElementById('myForm');

    const emailInput = document.getElementById('email');

    const phoneInput = document.getElementById('phone');

    const submitBtn = document.getElementById('submitBtn');

    const successMessage = document.getElementById('successMessage');

    const emailGroup = emailInput.closest('.input-group');

    const phoneGroup = phoneInput.closest('.input-group');

    function validateEmail(email) {

        if (!email) return false;

        return validator.isEmail(email);

    }

    function validatePhone(phone) {
```

```
    if (!phone) return false;

    const digits = phone.replace(/\D/g, '');

    return digits.length === 10 && /^\d{10}$/.test(digits);

}

function setFieldState(input, group, isValid, errorId, successId) {

    group.classList.remove('error', 'success');

    if (!input.value) {

        document.getElementById(errorId).style.opacity = '0';

        document.getElementById(successId).style.opacity = '0';

        return;

    }

    if (isValid) {

        group.classList.add('success');

        document.getElementById(errorId).style.opacity = '0';

        document.getElementById(successId).style.opacity = '1';

    } else {

        group.classList.add('error');

        document.getElementById(errorId).style.opacity = '1';

        document.getElementById(successId).style.opacity = '0';

    }

}
```

```
    emailInput.addEventListener('input', function() {

        setFieldState(emailInput, emailGroup, validateEmail(this.value), 'emailError',
'emailSuccess');

    });

    emailInput.addEventListener('blur', function() {

        setFieldState(emailInput, emailGroup, validateEmail(this.value), 'emailError',
'emailSuccess');

    });

    phoneInput.addEventListener('input', function() {

        this.value = this.value.replace(/\D/g, '').slice(0, 10);

        setFieldState(phoneInput, phoneGroup, validatePhone(this.value), 'phoneError',
'phoneSuccess');

    });

    phoneInput.addEventListener('blur', function() {

        setFieldState(phoneInput, phoneGroup, validatePhone(this.value), 'phoneError',
'phoneSuccess');

    });

    form.addEventListener('submit', function(e) {

        e.preventDefault();

        const emailValid = validateEmail(emailInput.value);

        const phoneValid = validatePhone(phoneInput.value);
```

```
        setFieldState(emailInput, emailGroup, emailValid, 'emailError',
'emailSuccess');

        setFieldState(phoneInput, phoneGroup, phoneValid, 'phoneError',
'phoneSuccess');

        if (emailValid && phoneValid) {

            submitBtn.innerHTML = '<i class="fas fa-spinner fa-spin"></i>
Submitting...';

            submitBtn.disabled = true;

            setTimeout(() => {

                successMessage.style.display = 'flex';

                form.style.display = 'none';

            }, 1500);

        }

    });

});
```

CONCLUSION

The contact form was successfully designed with a modern UI and effective validation for email and phone number.
Real-time feedback improves user experience by ensuring accurate and error-free data entry.
